

Personal Injury NSW Toolkit

Our exclusive Personal Injury NSW Toolkit – part of the Practical Guidance Personal Injury NSW module – helps you prepare your personal injury matters with unprecedented speed and precision. Personal injury specialists and general practitioners alike will benefit from significant time savings in calculating damages and reviewing medical evidence, with confidence every step of the way.

World-leading Personal Injury NSW Calculators

Never before has the calculation of damages in personal injury matters been so effortless.

Efficient

This groundbreaking and intuitive application:

- **Automates** the calculations necessary to determine losses under each head of damage;
- **Pre-populates values** based on the details of each matter and the law as at the relevant date; and
- **Determines and applies** the appropriate multipliers for calculating future losses.

By editing the basic details of a matter you can update all the calculations saved against that matter. For example, you can **recalculate certain heads of damage** based on a new date of assessment with the **click of a button**.

Comprehensive

Perform calculations based on **legal principles, statutory maximums, thresholds, rates, average weekly earnings**, and other variables as at any point in time from 1 January 2003 onwards. The seven calculators cover the assessment of damages under the **Motor Accidents Compensation Act 1999 (NSW)**, **Civil Liability Act 2002 (NSW)** and **Pt 5 of the Workers Compensation Act 1987 (NSW)**.

Intuitive

Create matters, save calculations over the course of a claim, edit previously saved calculations and export the calculations – including all workings – to Microsoft Word format.

Accurate

Have confidence in the accuracy of your calculations with tips and direction throughout the workflow.

“

An intuitive and user-friendly application, which provides users with confidence in their own calculations.

Timothy McGinley, Lawyer, Maurice Blackburn

”

- ✓ Calculators for each head of damage
- ✓ Create matters
- ✓ Save and edit calculations over the course of a claim

Comprehensive Medical Tools

Our medical tools describe, depict and define medical terminology in plain English and include cross-references to and from other medical information in the Personal Injury NSW module.

- Glossary of medical terms**
- Presented in a single document with a **quick-find index**, the glossary is a straightforward tool designed to give you **fast, simple explanations** of over 1300 terms found in medical reports and clinical notes.
- Clinical abbreviations**
- Presented in a single, indexed document, the clinical abbreviations tool **consolidates the definitions** of over 500 abbreviations and acronyms commonly found in clinical notes and other medical records.
- Medical diagrams**
- Effectively review and easily interpret medical information through annotated diagrams that clearly depict anatomical structures, movements, types of fracture and other medical terms. Gain a clearer understanding of a claimant's injuries and disabilities.

How can I access the Personal Injury NSW Toolkit?

The Toolkit is exclusive to subscribers of the Practical Guidance Personal Injury NSW module. Subscribe to the module and also access a broad collection of comprehensive practical content written by experts such as Sparke Helmore and Maurice Blackburn.
